Build What You Love - Women in Tech Hackathon
Feb
14
Saturday, February 14
9:00 AM - 5:00 PM
501 Folsom St
San Francisco, California
About Event
Following a series of successful community-first hackathons, we're hosting the largest hybrid AI hackathon for women and nonbinary folks in tech — with in-person attendance in the Bay Area and a fully supported virtual experience.

We're proud to be supported by Replit, Vercel, Daytona, MiniMax, and BEM, helping make this an accessible, high-impact build experience for our community.

💡 What to Expect

Hands-on workshops and mentorship from industry leaders and AI practitioners

A high-energy demo session judged by top founders, operators, and technologists

Prizes, recognition, and opportunities to showcase your work

A welcoming, collaborative environment designed to support builders at every stage

🏆 The Grand Prize

The winning team will receive a one-of-one, custom-designed jewelry piece by celebrity jeweler Kyle Chan, created exclusively for this hackathon.

Kyle Chan's work has been worn by Beyoncé, featured in La La Land on Emma Stone, and showcased across Vanderpump Rules and RHOBH. The piece is handcrafted in Los Angeles and designed as both a collectible trophy and a lasting symbol of what you built — something you won't find anywhere else.

🚀 Why Join?

Turn ideas into real prototypes, level up your skills, and meet people who genuinely support your growth. Whether this is your first AI project or your tenth, this hackathon is built to inspire, empower, and celebrate women and allies in tech.

🌟 Join us and build what you love — at the Bay Area's largest women-led AI hackathon.

🔗 More details: https://womenintechhack.com

AI Valley is a community rooted in supporting exceptional first-generation builders, founders, and creators. We curate environments where ambitious people meet collaborators, mentors, and opportunities through hackathons, workshops, and intimate gatherings across AI, tech, and the arts. If you care about who you build with as much as what you build, this is your place.
